MIMI-Rx™

AN INTELLIGENT PATIENT CARE SYSTEM

EagleForce Health

THE MEDICATION AND IMMUNIZATION MANAGEMENT INITIATIVE

PROVIDING THE MOST ADVANCED EVIDENCE-BASED CLINICAL INSIGHTS FOR ACCURATE AND PERSISTENT TREATMENT ACROSS THE CARE CONTINUUM.

TELEHEALTH

Complete interconnectivity and interoperability with all medical devices, platforms, and systems

REMOTE PATIENT MONITORING

Persistent patient monitoring enabled through a network of qualified devices and systems

REAL-TIME DATA

Instant, actionable data and monitoring for timely and effective planning and analysis

PRECISION CARE

Genomics insights, medication coordination, adherence tracking, drug-drug interactions and conflict alerts

SECURE PLATFORM

Persistent access, storage, and alerts through a HIPAA, HITECH, and NIST compliant platform

INVOICING CAPABILITIES

Capability to operate multiple billing streams, including telehealth and chronic disease management

WHY MIMI-Rx™?

MIMI-Rx™ employs neural computing within an artificial intelligence (AI) powered platform to create **the most holistic medical information system in existence.**

Our application has the capacity to:

- Host the entire personal health record of an individual across their life span, including real-time adherence of all medications and immunizations.

- Link to Community Resources and Evidence-Based Behavioral Health and Social Determinants of Health programs including PEARLS, Social Isolation Screening, Chronic Care Management, and Meals all of which are billable occurrences for providers.

- Monitor patients remotely via a secure Telehealth platform and FDA-approved medical sensor devices. Telehealth visits can be billed directly through the platform using billable remote patient monitoring CPT and Z codes.

Our patient-centered approach enables individuals to **connect with their entire care team,** have a **holistic view of their health information,** and **become active participants in their healthcare through a single platform.**

Providers also have access to a **more complete health record of their patients, telehealth capabilities to meet patients virtually,** and the **potential to generate additional revenue for their practice.**

UNIVERSALLY COMPATIBLE

Interoperability.

MIMI-Rx™ is operable on web and mobile platforms and is able to pair with any FDA approved Bluetooth devices. Devices are easy to operate and can be provided and billed through RPM CPT codes.

Examples of Customized MIMI-Rx™-Powered Remote Monitoring Kits

| Blood Glucose Monitor	Digital Weight Scale	Activity Monitor	Blood Pressure Monitor	Wireless Spirometer	Infrared Thermometer	Pulse Oximeter
DIABETES			**HYPERTENSION**	**ASTHMA & COPD**	**COVID-19**	

Telehealth Redefined.

Proudly providing integration and interoperability within all aspects of the medical care spectrum

- Appointment Scheduling
- Automated Reminders
- Simple Sign-On Process
- Synchronization with Calendars
- Documentation and Storage of Transcripts and Visits
- HIPAA Compliant Security
- Unlimited Cloud Storage
