Adjudicator ™

Real-Time Insurance Verification

EagleForce Health leverages a patented technology to seamlessly aggregate, integrate and analyze disparate patient data in real-time. The ADJUDICATOR™ solution establishes a secure interoperable environment across the necessary switch providers, PBMs and Processors establishing a complete individual patient profile with a universal ID. This process includes the ETL of basic mandatory pharmacy transaction data elements (LN, FN, DOB, ZIP, GENDER, and BIN/PCN when available). This information is supplemented with EagleForce's proprietary patient registry on over 250M individuals that is populated and refreshed 6x per day through the persistent harvesting of open source data including newspapers, social media and other proprietary sources. This process results in the most accurate and complete Government Beneficiary SMART Registry™ for evaluating claimants with regards to their government and commercial insurance benefits.

The ADJUDICATOR™ interrogates most commercial and all federal health plans. This includes all Medicare, Medicaid, VA, CHIP, Indian Health Services, Federal Employees and Retirees, Bureau of Prisons, including their Dependents. The system is also securely connected virtually to every health plan and pharmacy in the country allowing for Real-Time Processing of information, covered entity attestations and the ability to perform an audit in near real-time. Audit-ready reports can be generated in minutes, not days, weeks or months. A Real-Time dashboard allows users to define queries and see results immediately. The EagleForce Health ADJUDICATOR™ can upload your Medication Brands within 30 days of contract execution and is scaled to the entire US and 9 territories transaction volume.

ABOUT US

EagleForce Health's pedigree was established within the Intelligence, Defense and Homeland Security sectors and is recognized as a leading technology solution's company providing a broad range of eligibility systems development, organizational and operational assistance to "Big Data" processing including interoperability, predictive analytics, and IT functions. Our evidence-based eligibility & real-time monitoring systems have been deployed to solve some of the biggest technology challenges in the world including direct support to pharmaceutical manufacturers and pharmacies specific to the Federal Anti-Kickback Statute.
