

Optimizing Healthcare Decisions

## SOLUTION HIGHLIGHTS

### • COMPLIANCE WITH SUPPORT ACT

The Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment Support for Patients and Communities Act

### • NATIONWIDE PDMP COMMUNICATION

Independent state PDMP databases have limited access to medication history. EagleForce Health's CRx Monitor™ connects healthcare providers, pharmacists, and healthcare settings across the nation without limitations to state borders. Our System communicates among all 50 states and U.S. territories to provide the most accurate medication history for individual patients

### • REAL-TIME ALERTS AT POINT OF SALE

Our proven technology integrates with existing pharmacy POS processing system, through single sign-on, in workflow access, to provide Real-Time Alerts for Class II through Class V Controlled Substances, to automate intake and screening and safeguard against fraud and abuse

### • IMPROVED PAYMENT TRANSACTION

Current systems lack interoperability for cash transactions. CRx Monitor™ tracks all types of payments whether cash, card, or insurance

### • OPIOID SMART REGISTRY™

Contains millions of patient's attributes updated daily through our AI and machine learning tools. A Universal ID is established across all data sources and used to determine frequency and locations of prescriptions written and filled

# CRx Monitor™

## Opioid Management Suite

EagleForce Health's CRx MONITOR™ Real-Time Controlled Substance Prescription Monitoring Program connects pharmacies, healthcare providers, and health care settings across the nation without limitations to state borders. Our proven technology solution integrates with existing pharmacy and EMR solutions to monitor the complete lifecycle, from auto-submission of a clean electronic prescription of Controlled Substances, to automated intake and screening, real-time processing and safeguarding against fraud and abuse.

CRx MONITOR™ provides real-time controlled substance prescribe and dispense monitoring and alerting based on your established company, State and DEA business rules. The system was developed as an extension of our nationally recognized Real-Time Benefits Investigation (RTBI) solution that interrogates medication transactions for both commercial and government insurance coverage.

The Opioid SMART Registry™ contains millions of patient attributes (data points) that are updated 6X per day and is complemented by machine learning processes. The system establishes a universal ID (Master Patient Index) using its proprietary advanced analytics methodologies to identify patients across disparate systems including the ability to cross reference name spelling variances. The universal ID is established across all data sources to determine frequency of Class II through V prescriptions written and filled, including cash pay transactions, regardless of Provider, EMR or Pharmacy location.

## ABOUT US

EagleForce Health's pedigree was established within the Intelligence, Defense and Homeland Security sectors and is recognized as a leading technology solution's company providing a broad range of eligibility systems development, organizational and operational assistance to "Big Data" processing including interoperability, predictive analytics, and IT functions. Our evidence-based eligibility & real-time monitoring systems have been deployed to solve some of the biggest technology challenges in the world including direct support to pharmaceutical manufacturers and pharmacies specific to the Federal Anti-Kickback Statute.
