Surgical History				
ICD-Code	Past Surgical History	Performed By	Date	Actions
86.02Z	Resection of Appendix, Percutaneous Endoscopic Approach	Remedy	2022-06-20	View Delete

FULL-CIRCLE COMMUNICATION

Doctors, pharmacists, and other healthcare professionals can see the most comprehensive patient medication and immunization history, allowing for more effective treatment. Our solution helps to keep a record of what has and has not worked within your medication history. This will save time and hassle by helping to establish a plan that can be shared with certified health professionals to keep you on the best side of your health management.

MEDICATION MANAGEMENT WITH EASE

It can be difficult to manage multiple medications. Set medication reminders to help guide you through long term and short term medication regimens.

Knowing when you're on or off certain medications can help doctors and other health services providers know which plan of action to take to provide you with better quality of care.

TAKE CONTROL OF YOUR INFORMATION

MEMRx allows you to select which doctors can view and edit your detailed records during a routine visit.

Visiting a new service provider? If you're visiting a new health services provider that asks for your family health history. You are now able to carry those details with you wherever you go.

SECURE
 Your health records should be protected. Our application provides the highest level of protection on today's market.

COMMUNICATION ACROSS MULTIPLE PLATFORMS

MEMRx works in conjunction with a number of well-known fitness and genetics apps such as FitBit and 23andMe. Link your profiles to the MEMRx system to help provide the most comprehensive view of your personal health.
