

# MIMI-Rx

## POWERING REMOTE CLAIM BILLING AND CONNECTING PROVIDERS, PATIENTS, CAREGIVERS TO BEND THE COST CURVE

### CONNECTED PROVIDERS MAKE CARE MANAGEMENT EASIER REDUCE ERRORS. PREVENT READMISSIONS.

#### Managing complex care requires care coordination

- Care complexity demands better coordination to align resources and optimize outcomes.
- Tracking multiple touch points – assessments, care plans, performance indicators, implementation.
- Empowering caregivers to deliver and bill for services at the point of care.
- Facilitating remote and at-home care with geolocation capabilities.
- Integration with EMRs and other systems.

#### Specialty drug management depends on ensuring accurate and timely clinical information is available at the point of care

#### Medical expenses in a managed program require cost efficiency

- Cost efficiency is paramount to curbing medical expenses in managed programs.
- Coordination of care across all caregivers including doctors, nurses, navigators, front-line staff, support staff, and utilization managers streamlines intervention and reduces duplication of effort.
- Where resources are scarce, technology enables speed, accuracy, and scale.
- The availability of geolocation tracking for audit and cost reporting fills a critical care gap.
- Empowering support staff to train patients to use connected devices to monitor physiological parameters alerts to interventions and reduces readmissions.

### WHY MIMI-RX

MIMI-RX™ a cloud-based platform **powered by EagleForce AI-enhanced analytics** is the industry standard in care coordination, health data security, and ease of use.

**MIMI-RX simplifies billing process, increases access to care and promotes system interoperability**

### WHAT CAN MIMI-RX DO FOR YOU?

- Makes the work of care easier, faster, and more accurate.
- Enables remote billing at the point of care.
- Captures multiple billing streams including telehealth and chronic disease management and automatically generates billable forms for any payer type.
- Facilitates interoperability and information sharing securely among any EMR or hospital system.
- Enable billing and reimbursement for non-837 allowed transactions like transportation and meals.
- Highlights patient risk profiles.
- HIPAA- and HITECH-compliant systems secure PHI/PII at the highest standard.
- Matches required care with patient acuity.
- Makes health care accessible to patients remotely via secure HIPAA-compliant platform.

### GEOLOCATE PROVIDERS, PHARMACIES, REFERRALS

- Improve planning and referrals by using precise location.

### PRECISION MANAGEMENT DETAIL

- Customizable reporting filters based on a powerful and granular data set.
